Subject: Financial Assurance Annual Cost Estimate Update - US 27 Tires, Inc. (WACS ID: 101295)

Good afternoon Mr. Belfakir,

Please find below the information we discussed earlier about the annual cost estimate adjustment for US 27 Tires, Inc. Additional information regarding financial assurance requirements can be found on the Department's [Solid Waste Financial Assurance webpage](#).

For the 2019 adjustment, you will take the value of the 2018 cost estimate (\$5,300.00) and multiply it by the 2019 inflation factor (1.022) to determine the 2019 inflation adjusted cost estimate. You can describe this adjustment in a signed letter submitted via email to SWD_Waste@FloridaDEP.gov. I have attached to this email an example of a similar letter from another waste tire processing facility.

After our review, you will receive an approval letter from the Southwest District office approving the 2019 inflation adjustment. The Financial Assurance Coordinator in Tallahassee will be copied on the approval when it is sent out.

I followed up with the Financial Assurance Coordinator, Tor Bejnar, after we spoke to confirm the next steps in the process. Tor advised that once you have the updated cost estimate, you should check the current balance of the trust fund, and deposit additional funds as necessary to cover the amount of the updated cost estimate. When Tor receives the approval letter from my office, he will reach out to the bank directly for a status update on the trust fund. Once he

verifies that the trust fund covers the amount of the updated cost estimate, he will send a separate approval letter confirming that the trust fund is up to date.

Please feel free to contact me directly at the phone number listed below if you have any questions.

Thank you,

Emily Wargo

Re: CEMEX Construction Materials Florida, LLC – Brooksville **South** Cement Plant
Waste Tire Processing Facility, **2019** Financial Assurance Cost Estimate
FDEP Permit No. 22787-007-WT/MM, Site Certification PA 82-17R

Dear Mr. Ramirez:

The above referenced facility has experienced no changes the management of waste tires and is operating in compliance with the permit requirements. The maximum quantity of tires allowed to be stored on site is 300 tons. The anticipated disposal cost for the maximum storage quantity is calculated as follows:

2018 Disposal Cost Estimate = \$37,500.00
FDEP Inflation Multiplier **2019** = 1.018
2019 Disposal Cost Estimate (1.018 x \$35,211.47) = \$38,175.00
Current Bond Amount - \$58,440.00, Travelers Bond No. 105316798

Should you have any questions and/or comments or require additional information, please contact me at 352-799-7881, ext. 104, or robing.simons@cemex.com.

Respectfully,

A handwritten signature in black ink, appearing to read "Robin Simons", written over a horizontal line.
