Alexis,

All of the yard trash, including the new piles have been mulched as of February 12th.

The operator has mowed all of the pond 3 slopes and repaired all the the erosion. The bottom of the pond should be firm enough to support the equipment in 2 weeks if the relative dry weather holds. Maintenance of the pond bottom will take approximately 3-5 days. The operator has been able to mow and hand-clear approximately 98% of the pond bottom.

Please let me know if you have any questions or if you would like any additional information.

Thanks  
John

Good morning John:

I hope you're well. What is the status of this project?

Thank you,

Alexis

**Subject:** WACS 87895 Angelo's Yard Trash Processing

Alexis,

I wanted to let you know that all of the yard trash piles that were designated "existing" at the time of the last inspection have been mulched. Angelo's is currently mulching the "new" yard trash stockpile and should be finished with the work within 14 days.

The bottom of Pond 3 is still too soft to accommodate heavy equipment. If the dry weather holds, the pond bottom should be sufficiently dry in 1-2 weeks to finish the maintenance items.

Please let me know if you have any questions.

Thanks,
