Subject: Notification - Trail Ridge Landfill WACS 33628
Date: Thursday, September 10, 2020 9:47:15 AM

Pursuant to Condition 4 of the Water Quality Monitoring Plan associated with the site permit, Trail Ridge Landfill, Inc (TRL) hereby notifies the Florida Department of Environmental Protection (the Department) of first-time parameter detections above the Department's water quality standards (exceedance) specified in Chapter 62-520, F.A.C.

An initial detection of the following parameters above the Department's water quality standard were observed during the August 2020 monitoring event:

- Chromium, Nickel, and TDS at monitoring well MWB-13S
- Chloride and TDS at monitoring well MWB-40S
- Nickel at monitoring well SGMW-1SR
- Ammonia at surface water location SW-3.

These monitoring locations will be re-sampled on September 21 to confirm the detections. Other constituents above the Department's water quality standards or criteria specified in Chapter 62-520, F.A.C., in monitoring wells at Trail Ridge Landfill have been previously reported and will be discussed in the forthcoming semiannual report of the August 2020 data.
