Subject: Leachate Spill Notice

Hello Melissa, this morning at approximately 7:00am we had a leachate spill at the main leachate pump station. We estimated approximately 6,000 gallons left the containment and into the ditch north of the pump station. The leachate in the ditch was pumped back into the pump station and the soil area affected was cleaned. I will submit a full report on Monday. Thank you

Larry E. Ruiz
Manager Landfill Operations
