**Current Violations:**

Rule: 62-701.630, 62-701.710(1)(d)1., 62-701.710(7)(a), 62-701.730(11)(a), 62-711.500(3), 62-713.600(6)(a)

Question Number: 1.8

Explanation: According to 62-711.500(3), owners or operators of waste tire sites shall provide closing cost estimates for the quantity of waste tires on their site or the quantity of waste tires that they are permitted to have on their site, whichever is greater. The cost estimate shall be the amount that would be expended to remove, process, and dispose of waste tires on the site and to close the site.

Specifically, the total quantity of waste tires exceeds the permitted capacity according to the third quarter 2020 report, which is the most recent quarterly report. Therefore, the facility is no longer in compliance with financial assurance requirements.

Corrective Action: Reduce the quantity of waste tires on-site to the permitted capacity or below. See the permit or the comments below for the categorical breakdown of permitted storage capacities for whole waste tires, processed tires, residuals and used tires for resale.

Alternatively, if the quantity of waste tires is not reduced to the permitted capacity or below, within 30 days, financial assurance must be provided in the amount of tires on site according to the waste tire report, and within 30 days, the permit must be modified to increase the permitted capacity.

---

Rule: 62-711.540(1)(d)

Question Number: 9.10

Explanation: An annual fire safety survey was not conducted in 2020. The most recent fire safety survey on file is dated 2/22/19.

Corrective Action: Schedule a fire safety survey as soon as possible and submit the survey report as part of the next quarterly report.

---

Rule: 62-711.540(1)(d)

Question Number: 9.11

Explanation: Facility did not submit quarterly reports or annual fire safety survey during 2020.

Corrective Action: Submit 2020 quarterly reports and annual fire safety survey. In the future, quarterly reports shall be submitted to DEP by the 20th day of the month following the end of a quarter. Email reports to DEP\_CD@dep.state.fl.us.

**COMMENTS:**

Waste tire processing facility is operating under Permit Number 02897891-WT, issued 3/15/19 and expires 3/14/2024.

Processing involves storage and sorting of whole waste tires, tire chips and residuals. All storage and operations are performed outdoors. On-site permitted waste tire storage capacity is 825 tons and includes 200 tons of whole waste tires, 500 tons of processed tire chips, 125 tons of residuals, and used tires for resale (5% of daily collection).

The most recent quarterly report indicates that the processed tire and total permitted storage capacity were exceeded.

Quarterly reports and the annual fire survey were not submitted during 2020. According to James Hursh, a fire inspector at the Orlando Fire Department, a fire safety survey was not conducted in 2020 due to COVID-19. The most recent fire safety survey on file is dated 2/22/19.

Piles of whole waste tires and processed tires were not well maintained. Several piles did not have a 50-foot wide fire lane around the perimeter of the piles or were inaccessible due to obstructions in the fire lanes.

Item 1.9: The 2020 closure cost estimate was received 3/12/20. The 2021 closure cost estimate must be submitted by 4/6/21.
