Re: Trail Ridge Landfill Erosion Notification

Dear Mr. Schroer,

This letter is to inform you that Trail Ridge Landfill experienced moderate erosion due to heavy rainfalls within the past seven days; specifically, in the areas undergoing the stormwater construction improvement project and gas system installation project (phase 6). Thus, sediment has accumulated in stormwater ditches. In addition, sediment comingled with litter has form a delta at pond #3 inlet.

Additional time is needed to repair impacted areas and to remove sediment delta formation from pond #3.

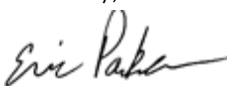

We are currently implementing the following corrective actions:

- Currently existing landfill personal are actively addressing the erosion areas.
- Additional personnel and equipment have been brought to the site to assist with the repairs and sediment accumulation in pond
- Employee work hours have been extended to help facilitate a timely clean-up

It is estimated that the repairs will be completed within a few weeks pending favorable weather patterns and the absence of any unforeseen problems or concerns. We will contact you if any issues arise that may alter the completion timeline.

If you have any additional questions or concerns please contact me via eparker1@wm.com or (904) 562-9755 or Greg Mathes via gmathes@wm.com. or (904) 748-6012.

Sincerely,

Eric Parker
Environmental Manager
