**Subject:** Hillsborough Southeast County Landfill Leachate Evaporator Update

All,

We wanted to provide a courtesy notification that the Hillsborough County Solid Waste Management Division expects to begin processing small quantities of leachate at the Southeast County Landfill (SCLF) Leachate Evaporator Facility (LEF) within the next few weeks as part of scheduled startup activities. The evaporator vendor and the County are still completing construction activities, testing, and commissioning the new enclosed flare and the leachate evaporator. We do not anticipate full scale operation until at least late August 2021. Throughout this process and during operation, the County will adhere to the Solid Waste Operations and Title V permit requirements.

Please feel free to call me at 813-955-4906 should you have any questions or concerns.

Thank you,

Kollan
