Subject: Compliance with Specific Condition 2c- Certification of Availability of Onsite Soils Declaration of Restrictive Covenants and Access Easement Agreement (Agreement) Pioneer Trail Borrow Pit- Use of On-site Soils for Closure Construction
Tomoka Farms Road Solid Waste Management Facility (WACS Facility No. 27540) County of Volusia Solid Waste Division

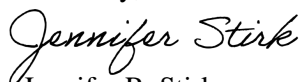

Dear Ms. Eldredge:

In accordance with the requirements of Rule 62-701.630 F.A.C., the County of Volusia (“the County”) submits this annual certification letter to verify the availability and accessibility of borrow sources on the Pioneer Trail Restricted Property as defined as Exhibit “B” of the above referenced Agreement. In accordance with the geotechnical engineering study conducted in 2016 and the April 6 , 2017 Agreement, the Pioneer Trail “West Borrow Area” (PTWBA) was designated as a source of final cover for closure of the North Cell Class I solid waste disposal unit at the Tomoka Farms Road Solid Waste Management Facility.

To date there has been no development activities at the designated PTWBA, and therefore it is certified the on-site soils designated for closure activities are available and accessible to the County. The County plans to initiate development of the PTWBA when a closure project is anticipated within the time permitted by the Agreement.

If you need additional information please contact me at (386)947-2952 or jstirk@volusia.org.

Sincerely,

Jennifer R. Stirk
