Attention: Ms. Regina Montgomery

Permit No: 0078767-030-SO-01

In accordance with Specific Condition 2.E.4. of the above-referenced permit, a Certification of Construction Completion (CCC) report was submitted to the Department. HDR Engineering, Inc. prepared the CCC report dated January 19, 2021 and received by the Department on January 24, 2021.

The report provided a description of the construction of a portion of the Phase VI gas collection system and retrofit of the existing gas collection system. The CCC document noted deviations to install new 10-inch pipe and valves at valve pit 1, to relocate vertical well EW-15B, and align the eastside header inside the waste footprint. The Department considers these deviations to be minor.

Based upon review of the Construction Quality Assurance Plan and review of the CCC report, the Department has no objections to the submitted certification.
