Re: Enterprise Landfill & Recycling
Facility ID Number: 87895
Pasco County

Dear Mr. Arnold:

Department personnel conducted a compliance inspection of the above-referenced facility on January 28, 2022. Based on the information provided during and following the inspection, the facility was determined to be in compliance; however, areas of concern were noted. A copy of the inspection report is attached for your records.

The Department appreciates your compliance efforts. Should you have any questions or comments, please contact Steve Tafuni at (813) 470-5877, or via e-mail at: steven.tafuni@floridadep.gov.

Sincerely,

1.0 - SECTION 1.0 - FILE REVIEW

Requirements:

The requirements listed in this section provide an opportunity for the Department's inspector to indicate the conditions found at the time of the inspection. A "Not Ok" response to a requirement indicates either a potential violation of the corresponding rule or an area of concern that requires more attention. Both potential violations and areas of concern are discussed further at the end of this inspection report.

Current Areas of Concern:

Rule: 62-701.510(3), 62-701.510(4), 62-701.730(10), 62-701.730(8)(f), 62-713.400(3)

Question Number: 1.6

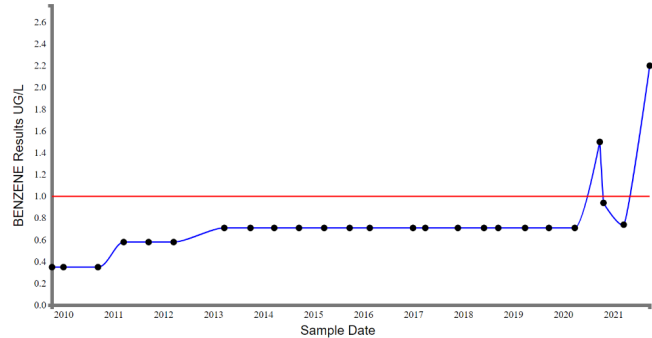

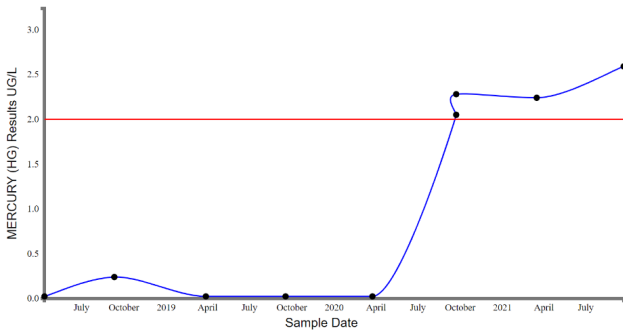

Explanation: The 2nd semi-annual (SA) 2021 Groundwater Monitoring Report (GWMR) was received on 12/23/2021. A complete review of historical data and trend analysis was not performed, however, recent exceedances of primary drinking water standards at certain wells were noted during the last several events, including mercury at MW-5BR (a designated Floridan compliance well) and benzene at MW-7A (a designated shallow aquifer detection well). An evaluation of the Mercury exceedances was provided in the 1st SA 2021 GWMR in accordance with Rule 62-701.510(6)(c), F.A.C., however, trending appears to indicate an increasing trend in this location following this evaluation. The evaluation does not appear to provide an explanation as to the source of the Mercury. Since this is a compliance well, corrective actions in accordance with Chapter 62-780, F.A.C. may still be necessary. Additionally, no discussion on benzene exceedances in MW-7A appear to have been included in corresponding reports. Note that evaluation monitoring in accordance with rule 62-701.510(6)(b), F.A.C. at this location may be necessary if exceedances continue.

Corrective Action: In the event that exceedances of either parameter persist in the 1st SA GWMR 2022, a meeting should be scheduled with the Department to discuss the need for additional assessment in these areas.

Attachments:

MW-5BR Mercury

MW-7A Benzene

Rule: 62-701.500(2)

Question Number: 2.11

Explanation: Department staff observed that adequate spotting of all incoming wastes was not being conducted. Some loads were pushed and compacted prior to spotter review due to number of spotters compared to volume of incoming waste and need for space for additional trucks to unload. Additional spotters may be necessary to ensure Op Plan Section 5.1 procedures are being met (2 loads/spotter at working face.)

Corrective Action: Facility response on February 9, 2022 states that "the landfill manager has been actively looking to hire an additional new spotter to address peak activities at the working face and to ensure Section 5.1 procedures of the Operations Plan are being met." Please provide the Department with a staffing update once hiring has been completed.
