Re: Pasco County Resource Recovery Facility
WACS ID 45799
Pasco County

Dear Mr. Roessler:

Department personnel conducted a compliance inspection of the above-referenced facility on December 21, 2022. Based on the information provided during and following the inspection, the facility was determined to be in compliance. A copy of the inspection report is attached for your records.

The Department appreciates your efforts to maintain this facility in compliance with state and federal rules. Should you have any questions or comments, please contact Emily Weaver at 813-470-5781, or via e-mail at: Emily.Weaver@FloridaDEP.gov.

Sincerely,

12.0 - SECTION 12.0 - WTE FACILITIES

Requirements:

The requirements listed in this section provide an opportunity for the Department's inspector to indicate the conditions found at the time of the inspection. A "Not Ok" response to a requirement indicates either a potential violation of the corresponding rule or an area of concern that requires more attention. Both potential violations and areas of concern are discussed further at the end of this inspection report.

PASCO COUNTY RESOURCE RECOVERY

Inspection Date: 12/21/2022

COMMENTS:

It rained heavily the day prior and was still lightly raining the morning of. Standing water was visible across the site as a result.

Construction for the new boiler installation at the WTE facility has not yet begun. Please keep the Department updated as this process begins.

At the time of inspection, the alarm system for the sump outside of the ash containment building at the WTE facility was not able to be tested. However, visually it appeared to be in proper working order.

Additionally, by the time of the inspection (on 12/21/2022), Consent Order OGC File No. 22-2538 was closed by the department as all necessary requirements were met.

Item 1.6: Groundwater monitoring data was reviewed for groundwater standard exceedances, completeness, and quality assurance/quality control (QA/QC); however, a review of historical data trending was not performed.

Item 1.8 - Please continue to work with the Financial Assurance Working Group in Tallahassee to ensure financial assurance is updated by March 31, 2023.

Item 2.18 & 2.19: At the time of the inspection intermediate cover in the form of onsite processed yard waste was being used to cover active filling areas on both the Class I and Class III landfills, as well as previous temporary access roads. Department staff also observed areas of active hog damage on the northeast side of the SW-1. Please continue to fill and revegetate the areas of impact. When discussed, the facility representative explained that hog trapping was still the main means of controlling the hogs accessing the site.

Item 2.21: At the time of inspection, there were several areas visible on both the Class I and Class III landfills where vegetation was sparse. Please monitor these areas and apply reseeding and/or resodding measures as needed to ensure adequate erosion control.

Item 2.23: Construction of the deep injection well is complete, and the injection well is online. During the inspection the system was off as the leachate tank needed repairs. The leachate tank is currently out of service and was being repaired at the time of the inspection. Please provide additional information about the most recent tank inspection findings and subsequent repairs once completed.

Item 2.37: At the time of the inspection, several groundwater wells were checked for proper labeling and access controls. Of the ones checked, all met necessary requirements, however not all wells onsite were checked.

Item 12.7: At the time of inspection, a small area of damage was seen at the entrance of the tipping floor of the WTE facility. Please contact the department within 15 days with a time and plan to completion of necessary repairs.
