SUBJ: Notice of Resampling – First Semi-Annual Sampling Event – Quarter #2 2023
Pasco County Resource Recovery Facility
Facility ID No. 45799; FDEP Permit No. PA 87-23

The intent of this letter is to notify the Department of the completion of the initial Semi-Annual Groundwater Sampling Event in accordance with Permit No. PA 87-23 which was conducted during the period of April 25th-27th, 2023. The initial laboratory results for this sampling event, which were received on May 31st, 2023, indicated that two wells showed parameters at levels above water quality standards. Per 62-701.510(6)a F.A.C., the County is electing to resample these wells in order to confirm the initial results. Additionally, a number of other wells were resampled due to handling issues encountered at the testing laboratory. Resampling was conducted on June 27th and 28th, 2023 within the 30-day window allowed for resampling. The County is currently awaiting the finalized laboratory report from the resampling and will submit to the Department the complete Semi-Annual Groundwater Monitoring Report, including discussion of the resampling activities, within 60 days of receipt of the finalized resampling laboratory results.

Thank you,

Timothy Treshler
Senior Program Manager
Solid Waste and Resource Recovery Department
